

# AGRIMA DEEDWANIA

<https://agrimadeedwania.github.io/>

Biotech Junior Research Scientist, Inito  
B.Tech, Biochemical Engg. and Biotechnology, IIT Delhi

Mobile no: (+91)9461871333  
Email: agrimadeedwania321@gmail.com

## EDUCATION

**Indian Institute of Technology Delhi**  
B.Tech. Biochemical Engineering and Biotechnology  
**CBSE-AISSCE XII Std**  
MDS Senior Secondary School, Udaipur

*July 2018 - May 2022*  
Overall GPA: 8.362/10  
*2017*  
Overall Percentage: 94.4

## INDUSTRY EXPERIENCE

**Inito**<sup>1</sup>  
Biotech Junior Research Scientist

*June 2022- present*

- Working on **Lateral Flow based Blood Assays**, primarily solving the issue of RBC interference.
- Developing **synthetic antibodies** for LFAs using bioinformatics tools and validating results experimentally, thus reducing the cost, **increasing the sensitivity and stability** of the product.

## PROJECTS AND RESEARCH

**Construction of Temperature Sensitive Plasmid Replicon for *Gordonia***<sup>2</sup>: (dry, wet lab)  
*Guide: Prof Preeti Srivastava (DBEB, IIT Delhi)* (March 2021-August 2022)

- Predicted the **TS mutant** of repB protein of pRSG43 plasmid using bioinformatics tools.
- Performed **homology modeling** and **DNA-Protein docking** to predict and compare interactions.
- Performed **mutagenesis** of WT repB protein and screened for TS phenotype in *Gordonia*.

**ssDNA Export from Synthetic Cell and Linker Induced Fusion of Cells**<sup>3</sup>: (dry lab)  
*Guide: Prof Richard M. Murray (CDS and Bioengineering, Caltech)* (May 2020-August 2020)

- Studied **import/ export** of molecules and membrane protein transport channel in a synthetic cell.
- Designed an efficient protocol for **inducible gene expression** of the membrane transport channel.
- Designed protocol for **export of ssDNA** and **fusion of two cells** induced by the exported DNA.

**RNA Thermometers**<sup>4</sup>: (dry, wet lab)  
*Guide: Prof Shaunak Sen (Department of Electrical Engineering IIT Delhi)* (Aug 2019- December 2020)

- Designed **nucleic acid structures and melt profile** of RNA thermometers at different temperature.
- Experiments of protein expression of thermometers like rpoH, agsA, cspA at different temperatures.

**Multimomics Data visualization**<sup>5</sup>: (dry lab)  
*Guide: Prof Sonika Tyagi (Bioinformatics lab, Monash University)* (June 2021-August 2021)

- Visualised the extracted multimomics data using Gosling- A Grammar-based Toolkit for Genomics Data.

## SKILLS AND STRENGTHS

- **Dry-lab Skills:** Homology modeling, Docking, MD Simulations, CRN Modelling and simulation
- **Wet-lab Skills:** Estimation, extraction and purification of nucleic acids, proteins, lipids, chromatography, cloning, electrophoresis, mutagenesis, PCR, DNA and RNA isolation, Chemical competent and electrocompetent bacterial cell preparation, transformation, fluorimetry, bacterial staining, bacterial growth analysis, microscopy, ELISA, Biochemical assay
- **Languages:** Python, MATLAB, C/C++

## RELEVANT LABORATORY COURSES

---

- **Biochemistry** - Estimation of proteins and nucleic acids; Extraction of lipids; Gel filtration and Ion exchange chromatography; Gel electrophoresis; DNA extraction and purification, enzyme kinetic analysis
- **Microbiology** - Morphological study of bacteria and bacterial spores by staining; biochemical identification of microorganisms; direct and indirect ways of counting microbes; bacterial growth.
- **Introductory Biology** - Response of cells and plant tissues in different solutions; Observing cells using light and fluorescence microscopy; SDS PAGE, Agarose gel electrophoresis.
- **Bioinformatics** - Accessing various biological databases, analyzing DNA, RNA and Protein Sequences in Databases, find Regulatory Motifs in DNA, sequence alignment, sequence comparison, Homology modelling, Docking, MD Simulation
- **Molecular Biology** - Plasmid extraction, Genomic DNA extraction, Gel Electrophoresis, PCR, Restriction Digestion, gel extraction, Cloning, Competent cell preparation, transformation, protein expression
- **Bioprocess Engineering** - Sterilization, Sugar estimation using DNS, determining reactor kinetics, mixing time, dissolved oxygen, oxygen transfer coefficient in bioreactors and fermenters
- **Rexombinant DNA Technology** - Sequence retrieval, primer design, various tagging, luciferase assay, mutagenesis, siRNA design, qPCR, mammalian cell transfection

## EXTRA-CURRICULAR ACTIVITIES

---

### iGEM:

(Aug 2021- May 2022)

- **Gold Medal Winner** at iGEM Grand Jamboree competition 2022 for the lead recovery project<sup>6</sup>. **Advisor** and Mentor for the IIT-Delhi team.
- Formalized the **Synthetic Biology club** at Institute level, procured lab space, funding for the team and iGEM 2022 competition.
- **Overall Coordinator** of the team, lead and trained a team of 20 undergraduate students.
- **Ideated the project** of lead detection and recovery via a biosensor for iGEM 2022 competition, **trained wet lab and dry lab techniques** to the undergraduate students.
- **Conducted events** like quizzes, workshops and seminars at institute as well as various schools to increase interest in synthetic biology.

### Sports:

(Aug 2018-May 2022)

- **Institute Badminton Captain** (2021-2022)- Lead a team of 5 students, held regular badminton practices and won **silver medal** at Sportech 2022.
- **General Championship** winner, Honoured by a **Silver Coin** for a significant contribution at **annual Inter-IIT Sports Meet 2018**.

### Indradhanu:

(January 2019-May 2022)

- Formalized the **LGBTQ+** student body at the institute level; working to **create a safe and inclusive space** for the students.
- Successfully organised the **first IIT Delhi Pride March** in 2019. Also conducted various events like movie screening, workshops, poster making for increasing awareness among the IIT Delhi community throughout the year.
